Home

Functional Overview

The primary landing screen acts as an emergency response forum and coordination hub. It prioritizes data based on proximity to the user and organizes the logistics of collection centers (*Acopios*).

Key Components & Detailed Logic

- **Header & Notifications:** Displays the section title ("Foro") with a sub-label "ordenado por cercanía" (sorted by proximity). The bell icon on the right handles system notifications.
- **"Mis Acopios" (My Collection Centers) Carousel:**
 - Horizontal scrolling section showing centers created or managed by the user.
 - Cards contain a priority indicator/alert badge (e.g., the exclamation mark badge).

- Includes a prominent **"+" Card** acting as a shortcut to trigger the collection center creation flow.
- **Category Filters (Pills):** Tabs for "Todas", "Incendio", "Inundación", and "Acopio" allow the user to filter the main feed dynamically without reloading the page.
- **Proximity Feed:** List items automatically append a distance metric on the far right (e.g., 0.8 km, 1.4 km).
- **"Acopios Cerca - Unirte" (Nearby Centers - Join):** A specific call-to-action card at the bottom targeting nearby hubs that require more volunteers. Clicking **"Unirme"** updates the user's status for that specific hub.
- **Global Navigation Bar:** Fixed bottom navigation with three main tabs: **Foro** (Active), **Mapa**, and **Perfil**.

Functional Overview

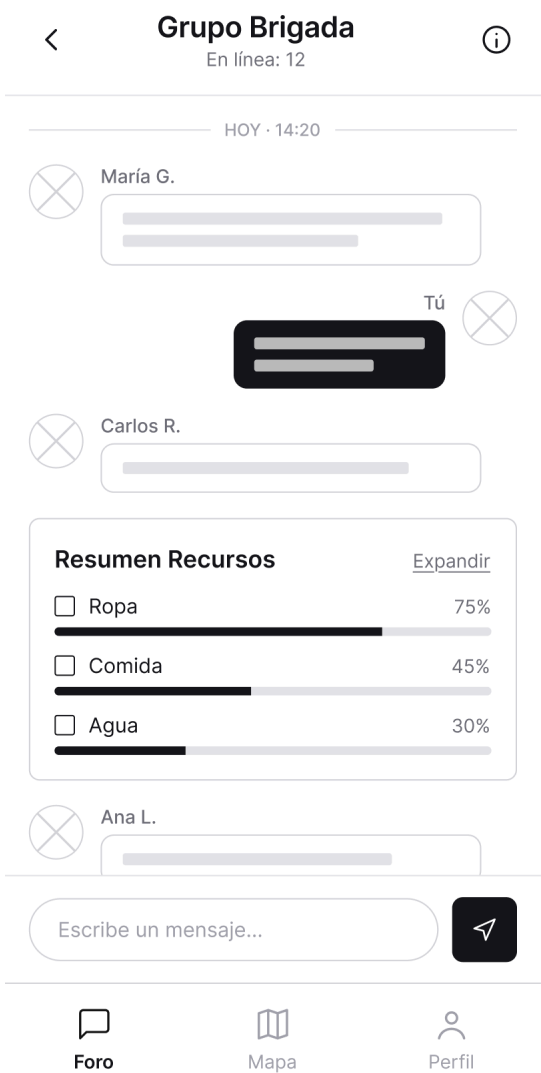

Provides granular details about a specific collection center's operational needs, exact location, and contact points.

Key Components & Detailed Logic

- **Header:** Displays the center's name (e.g., "Temuco Centro") with a standard back navigation arrow and an information (i) icon for legal/operational metadata.
- **Interactive Mini-Map:** A static placeholder that expands or redirects to the **Mapa libre** view when tapped.
- **Status Badges:** Displays real-time operational tags like **"Urgente"** (High Priority) and operating hours (e.g., 8 - 20h).
- **Resource Supply Trackers ("Necesitamos ahora"):**

- Dynamic tags displaying specific resource requests along with quantities (e.g., Agua x50, Alimentos, Ropa, Medicam.).
- **Information Fields:** Read-only structured fields showing the exact physical address (*Dirección*) and the designated leader (*Coordinador*).
- **Primary Action Buttons:**
 - **"Cómo llegar" (Get Directions):** Triggers external map applications (Google Maps/Apple Maps) via deep-linking.
 - **"Chat":** Redirects the user directly to the dedicated group chat.

Chat Acopio Point

Functional Overview

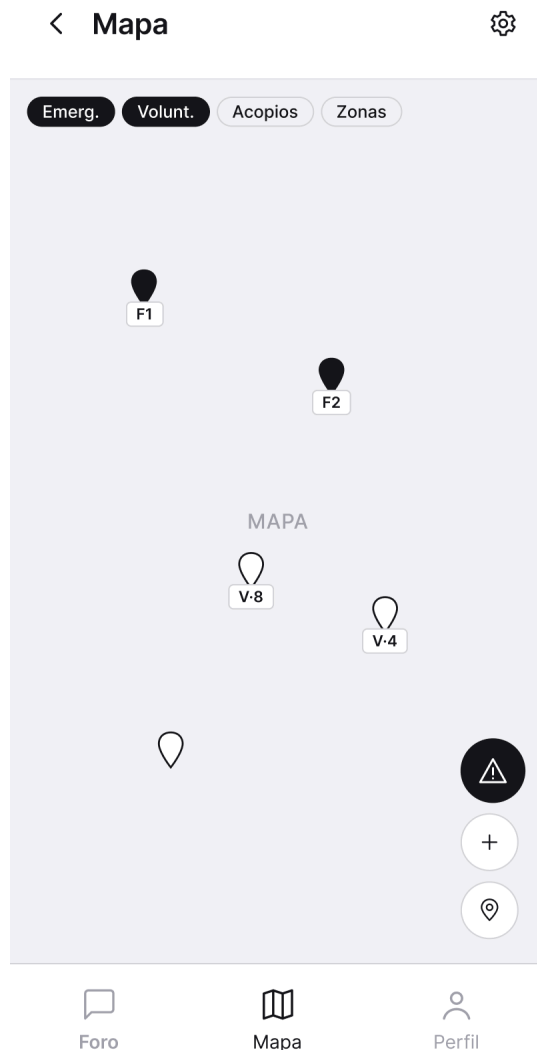

A real-time communication channel for coordination teams. It features a persistent, pinned summary tool to track resource fulfillment live.

Key Components & Detailed Logic

- **Header:** Shows the group name ("Grupo Brigada") and active users online simultaneously (e.g., "En línea: 12").
- **Dynamic Chat Feed:** Standard asynchronous bubble structure separating incoming messages (left-aligned with avatars) and outgoing user messages (right-aligned, dark background).
- **"Resumen Recursos" (Resource Summary Panel):**
 - A pinned widget within the chat interface.

- Can be minimized or maximized using the "**Expandir**" toggle.
 - Displays progress bars with percentage values tracking stock fulfillment levels (e.g., Ropa 75%, Comida 45%, Agua 30%).
 - *Permission Logic*: Only administrators/coordinators have the rights to check boxes or modify progress metrics; regular volunteers see this as read-only.
- **Message Input Bar**: Fixed at the bottom, containing a text field placeholder ("Escribe un mensaje...") and a floating action send button.

Free Map

Functional Overview

A geospatial visualization screen displaying active fire zones, emergency alerts, and operational infrastructure on a live map interface.

Key Components & Detailed Logic

- **Map Layer Filters:** Top pill buttons (**Emerg.**, **Volunt.**, **Acopios**, **Zonas**) toggle map pins visibility on and off dynamically.
- **Custom Map Pins:**
 - **Dark Pins (F1, F2):** Represent active fire focuses (*Focos activos*).
 - **Light Outlined Pins (V-8, V-4):** Represent volunteer team clusters and their capacities.
- **Floating Action Action Buttons (FABs):**
 -

- **Plus Icon (+):** General map zoom or element creation.
- **Target/Location Icon:** Centers the map camera onto the user's current GPS location.

Profile

Functional Overview

Allows volunteers to manage their personal profile data, toggle system availability states, and manage push notifications.

Key Components & Detailed Logic

- **Avatar Management:** Profile picture container with a dedicated camera icon badge overlays and a clear **"cambiar foto"** text action triggers device camera/gallery access.
- **"Activo Disponible" Switch:** A master toggle button. When enabled, it flags the user in the database as ready to receive real-time voluntary assignments (*Recibe asignaciones voluntarias*).
- **Editable Text Fields:** Input fields for **Nombre** (Name), **Email**, and **Teléfono** (Phone) featuring inline edit icons (pencils) on the right edge.

- **"Alertas críticas" Switch:** Toggle switch dedicated strictly to overriding silent modes for critical emergency announcements or evacuation orders.

Functional Overview

An urgent alert generation form designed to dispatch immediate, structured distress signals to nearby brigade forces.

Key Components & Detailed Logic

- **Header:** Clear title "Nueva Alerta" with a subtitle reassuring target transmission ("Se envía a la brigada"). An "X" button cancels the wizard flow.
- **Alert Category Grid ("Tipo"):** Four high-contrast selectable grid blocks containing distinct structural alerts: **Evacuar** (Selected state/Dark fill), **Cambio zona**, **Pausa**, and **SOS**.
- **Audience Target Selection ("Destinatarios"):** Filter chips indicating target message reach (e.g., *Todos (18)*, *Equipo A*, *Equipo B*).
- **Message Block:** A multiline text input area for typing custom descriptions or sitreps (situational reports).
- **Safety Interlocking Action Button:**
 - Label: **"MANTENER PARA ENVIAR"** (Hold to Send).
 - *Interaction Design:* Requires a long-press hold action (e.g., 3 seconds) instead of a simple tap to prevent accidental emergency dispatches during stressful scenarios.

Functional Overview

The first stage of a multi-step modal setup wizard dedicated to establishing a new resource hub location.

Key Components & Detailed Logic

- **Progress Tracking Header:** Explicit breadcrumb indicator reading "Paso 1 de 2 - ubicación" (Step 1 of 2 - location).
- **Form Text Fields:**
 - **"Nombre Del Punto":** Includes clear instructional placeholders (e.g., *Ej Acopio Temuco Centro*).
- **"Tipo de Punto" Segmented Control:** Toggle choices between three logical structural setups: **Permanente** (Selected state), **Temporal**, or **Móvil**.
- **Location Picker Map Window:**

- Embedded miniature map module featuring a fast-action button overlay **"usar mi ubic"** (Use My Location) to capture coordinates directly via phone GPS.
- **Geographical Text Overrides:** Manual backup text fields for **Comuna** (Municipality) and **Dirección** (Street Address).
- **Wizard Controls:** Balanced dual button configuration at base: **"Cancelar"** (cancels process back to Home) and **"Siguiente"** (validates step 1 inputs and moves forward to step 2).

Functional Overview

The initial phase of a 2-step wizard designed to register a new crisis supply hub by establishing its identity, operational classification, and geographic coordinates.

Key Components & Detailed Logic

- **Progress Header:** Features a back-navigation chevron, the primary title "Nuevo Acopio", and step microcopy reading "Paso 1 de 2 - ubicación" to set user expectations.
- **"Nombre Del Punto" Input Field:** A standard text input box with a clear placeholder styling example (*Ej Acopio Temuco Centro*).

- **"Tipo de Punto" Segmented Control:** A mutually exclusive horizontal button group categorized into **Permanente** (Selected state), **Temporal**, and **Móvil**. Toggling alters metadata constraints on the backend.
- **Map Coordinate Selector:**
 - A bounding container box presenting a localized map view.
 - Features a floating action chip labeled **"usar mi ubic"** (with a geolocation icon) that instantly pulls the device's native GPS coordinates.
- **Geographic Form Overrides:** Two text fields, **Comuna** (Municipality) and **Dirección** (Street Address), acting as alphanumeric descriptive backups for database query indexing.
- **Form Actions Layout:** Fixed bottom action pair layout: a secondary **"Cancelar"** outline button to abort data entry, and a primary solid **"Siguiente"** button to trigger step validation and progress forward.

crear acopio

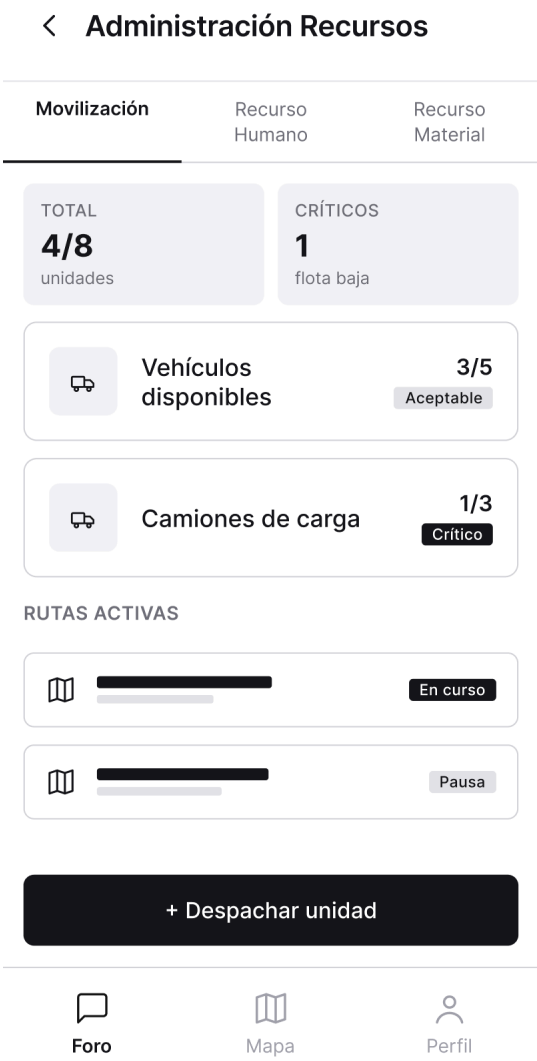

The final stage of the setup creation flow, focusing on resource categorization, operational priority flags, timing rules, and primary coordinator contact entry.

Key Components & Detailed Logic

- **Progress Header:** Updates dynamically to show "Paso 2 de 2 - Detalles". The back arrow returns users to Step 1 while persistently caching filled fields.
- **"Categorías" Pill Selector:**
 - A dynamic tagging interface. Selected options feature active close cross-marks (e.g., Agua X, Alimentos X).
 - An auxiliary inline **"+" button** triggers an overlay modal or dropdown menu to add unlisted categories (e.g., *Ropa*, *Medicamentos*).
- **"Nivel de Urgencia" Segmented Toggle:** A tri-state selector establishing site priority: **Normal** (Selected/Dark state), **Alto**, and **Crítico**. This setting directly determines feed sorting hierarchies on the Home screen.

- **"Horarios" Time Fields:** Two inline, structured text input fields formatted specifically for [HH:MM] to [HH:MM] time-window entries.
- **"Contacto Responsable" Input Stack:**
 - **Nombre:** Free text container for the primary coordinator's name.
 - **Phone Input Field:** Auto-prefixed with country dial code metadata text (+569 for Chile) to guarantee correct formatting for direct WhatsApp or mobile phone routing links.
- **Completion Actions:** The bottom controls update to an **"atrás"** secondary button and a solid **"crear acopio"** button, which submits the completed payload to the server.

Perfil

Functional Overview

A comprehensive logistics dashboard for coordinators to monitor fleet statuses, manage material transport dispatching, and track active supply routes.

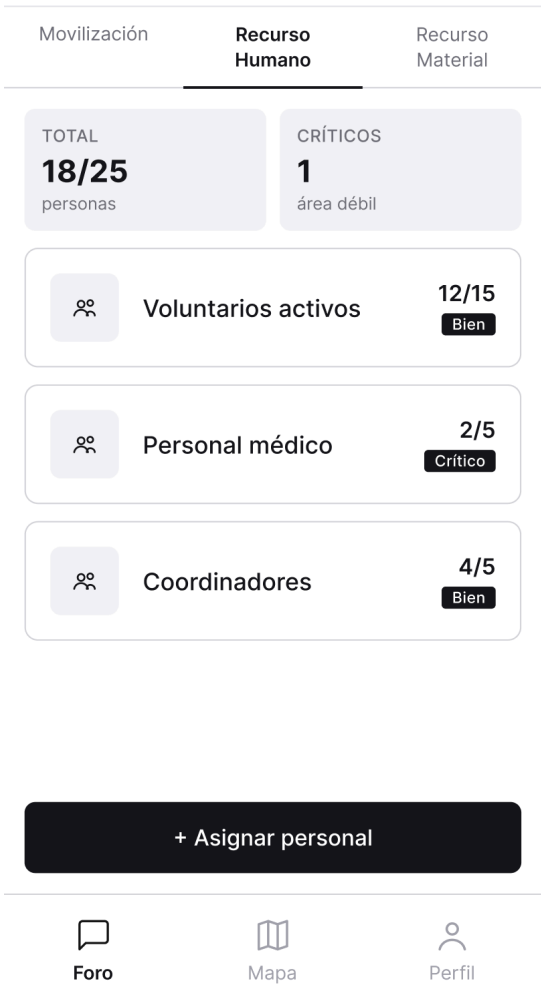

Key Components & Detailed Logic

- Segmented Top Tab Bar:** Switches dashboard contexts cleanly without page refreshes. Features three views: **Mobilización** (Active), **Recurso Humano**, and **Recurso Material**.
- KPI Highlight Metrics Container:** Two high-contrast summarize boxes:
 - TOTAL:** Shows active unit ratios (e.g., 4/8 unidades).
 - CRÍTICOS:** Alerts users to immediate fleet deficits (e.g., 1 flota baja).
- Fleet Category List Cards:** Structured resource tracking rows detailing target status states via stylized tags:

- *Row 1:* **Vehículos disponibles** showing a fulfillment ratio of 3 / 5 accompanied by an **"Aceptable"** system label.
 - *Row 2:* **Camiones de carga** showing a dangerous fulfillment gap of 1 / 3 flagged with a high-visibility **"Crítico"** tag.
- **"RUTAS ACTIVAS" Live Feed:** Monitors in-transit operations. Each row contains a map-icon prefix, route name/line mask, and real-time status chips indicating whether a route is **"En curso"** (Active) or **"Pausa"** (Delayed).
- **Primary Fleet Action Button:** A full-width, fixed bottom action button labeled **"+ Despachar unidad"** that brings up a route and vehicle assignment wizard form.

Human Resources

< Administración Recursos

Functional Overview

A dedicated personnel dashboard enabling coordinators to monitor specialized staff categories on-site, audit coverage gaps, and deploy fresh volunteers.

Key Components & Detailed Logic

- **Segmented Top Tab Bar:** Now highlights the second view index: **Recurso Humano** (Active layout state).
- **KPI Highlight Metrics Container:**
 - **TOTAL:** Tracks macro staffing fulfillment ratios (e.g., 18/25 personas).
 - **CRÍTICOS:** Flags operational weak spots dynamically (e.g., 1 área débil).
- **Personnel Allocation List Cards:** Breaks down staff into specialized cohorts with targeted health-check labels:

- *Voluntarios activos*: Shows a stable 12 / 15 staff presence with a reassuring **"Bien"** badge.
- *Personal médico*: Highlights a dangerous shortage of 2 / 5 medical assets, triggering a high-contrast **"Crítico"** badge.
- *Coordinadores*: Displays optimal management staffing level at 4 / 5 with a **"Bien"** badge.
- **Primary Personnel Action Button**: Features a solid full-width bottom layout button labeled **"+ Asignar personal"**. Tapping this button routes directly to the volunteer matching directory or dispatches alert notifications to verified on-call workers.
