APPORTE - PROJECT AGENDA

01

The Problem

Coordination chaos & breakdowns
in La Araucanía

02

UX Personas

The faces of the emergency
(Sebastián, Claudio, Carlos)

03

The Solution

Centralized digital hub for climate
operations

04

Value Proposition & Research

Data-driven response & Value
Canvas analysis

05

Interface Evolution

Transition journey from Low-Fi
wireframes to High-Def

06

Main Functionalities

Squad assignments, live heat maps
& resource logs

07

End-to-End User Journey

Complete operational workflow
from alert to task completion

Coordination Chaos in Emergencies

Emergency volunteers in La Araucania face **overlapping tasks**, missed updates, and communication breakdowns during crises, leading to critical information loss and inefficient resource allocation amidst wildfires and floods, hindering effective response efforts.

User's APPorte

- Carlos Morales
- 45 years old

Traits:

- Temporarily relocated to an emergency shelter.
- Urgent need to find and access reconstruction resources.

- Claudio Cáceres
- 25 years old

Traits:

- Natural leader coordinating volunteer squads.
- Demands fast responses and efficient data organization.

- Sebastián Sandoval
- 30 years old

Traits:

- Struggles with high-stress situations.
- Not highly tech-savvy (Needs a simple, intuitive UI).

Centralized Digital Hub for Coordination

APPorte offers a **unified digital platform** that consolidates communication and task management to streamline volunteer operations, reducing chaos and improving efficiency during critical climate emergencies in La Araucania.

Value Proposition

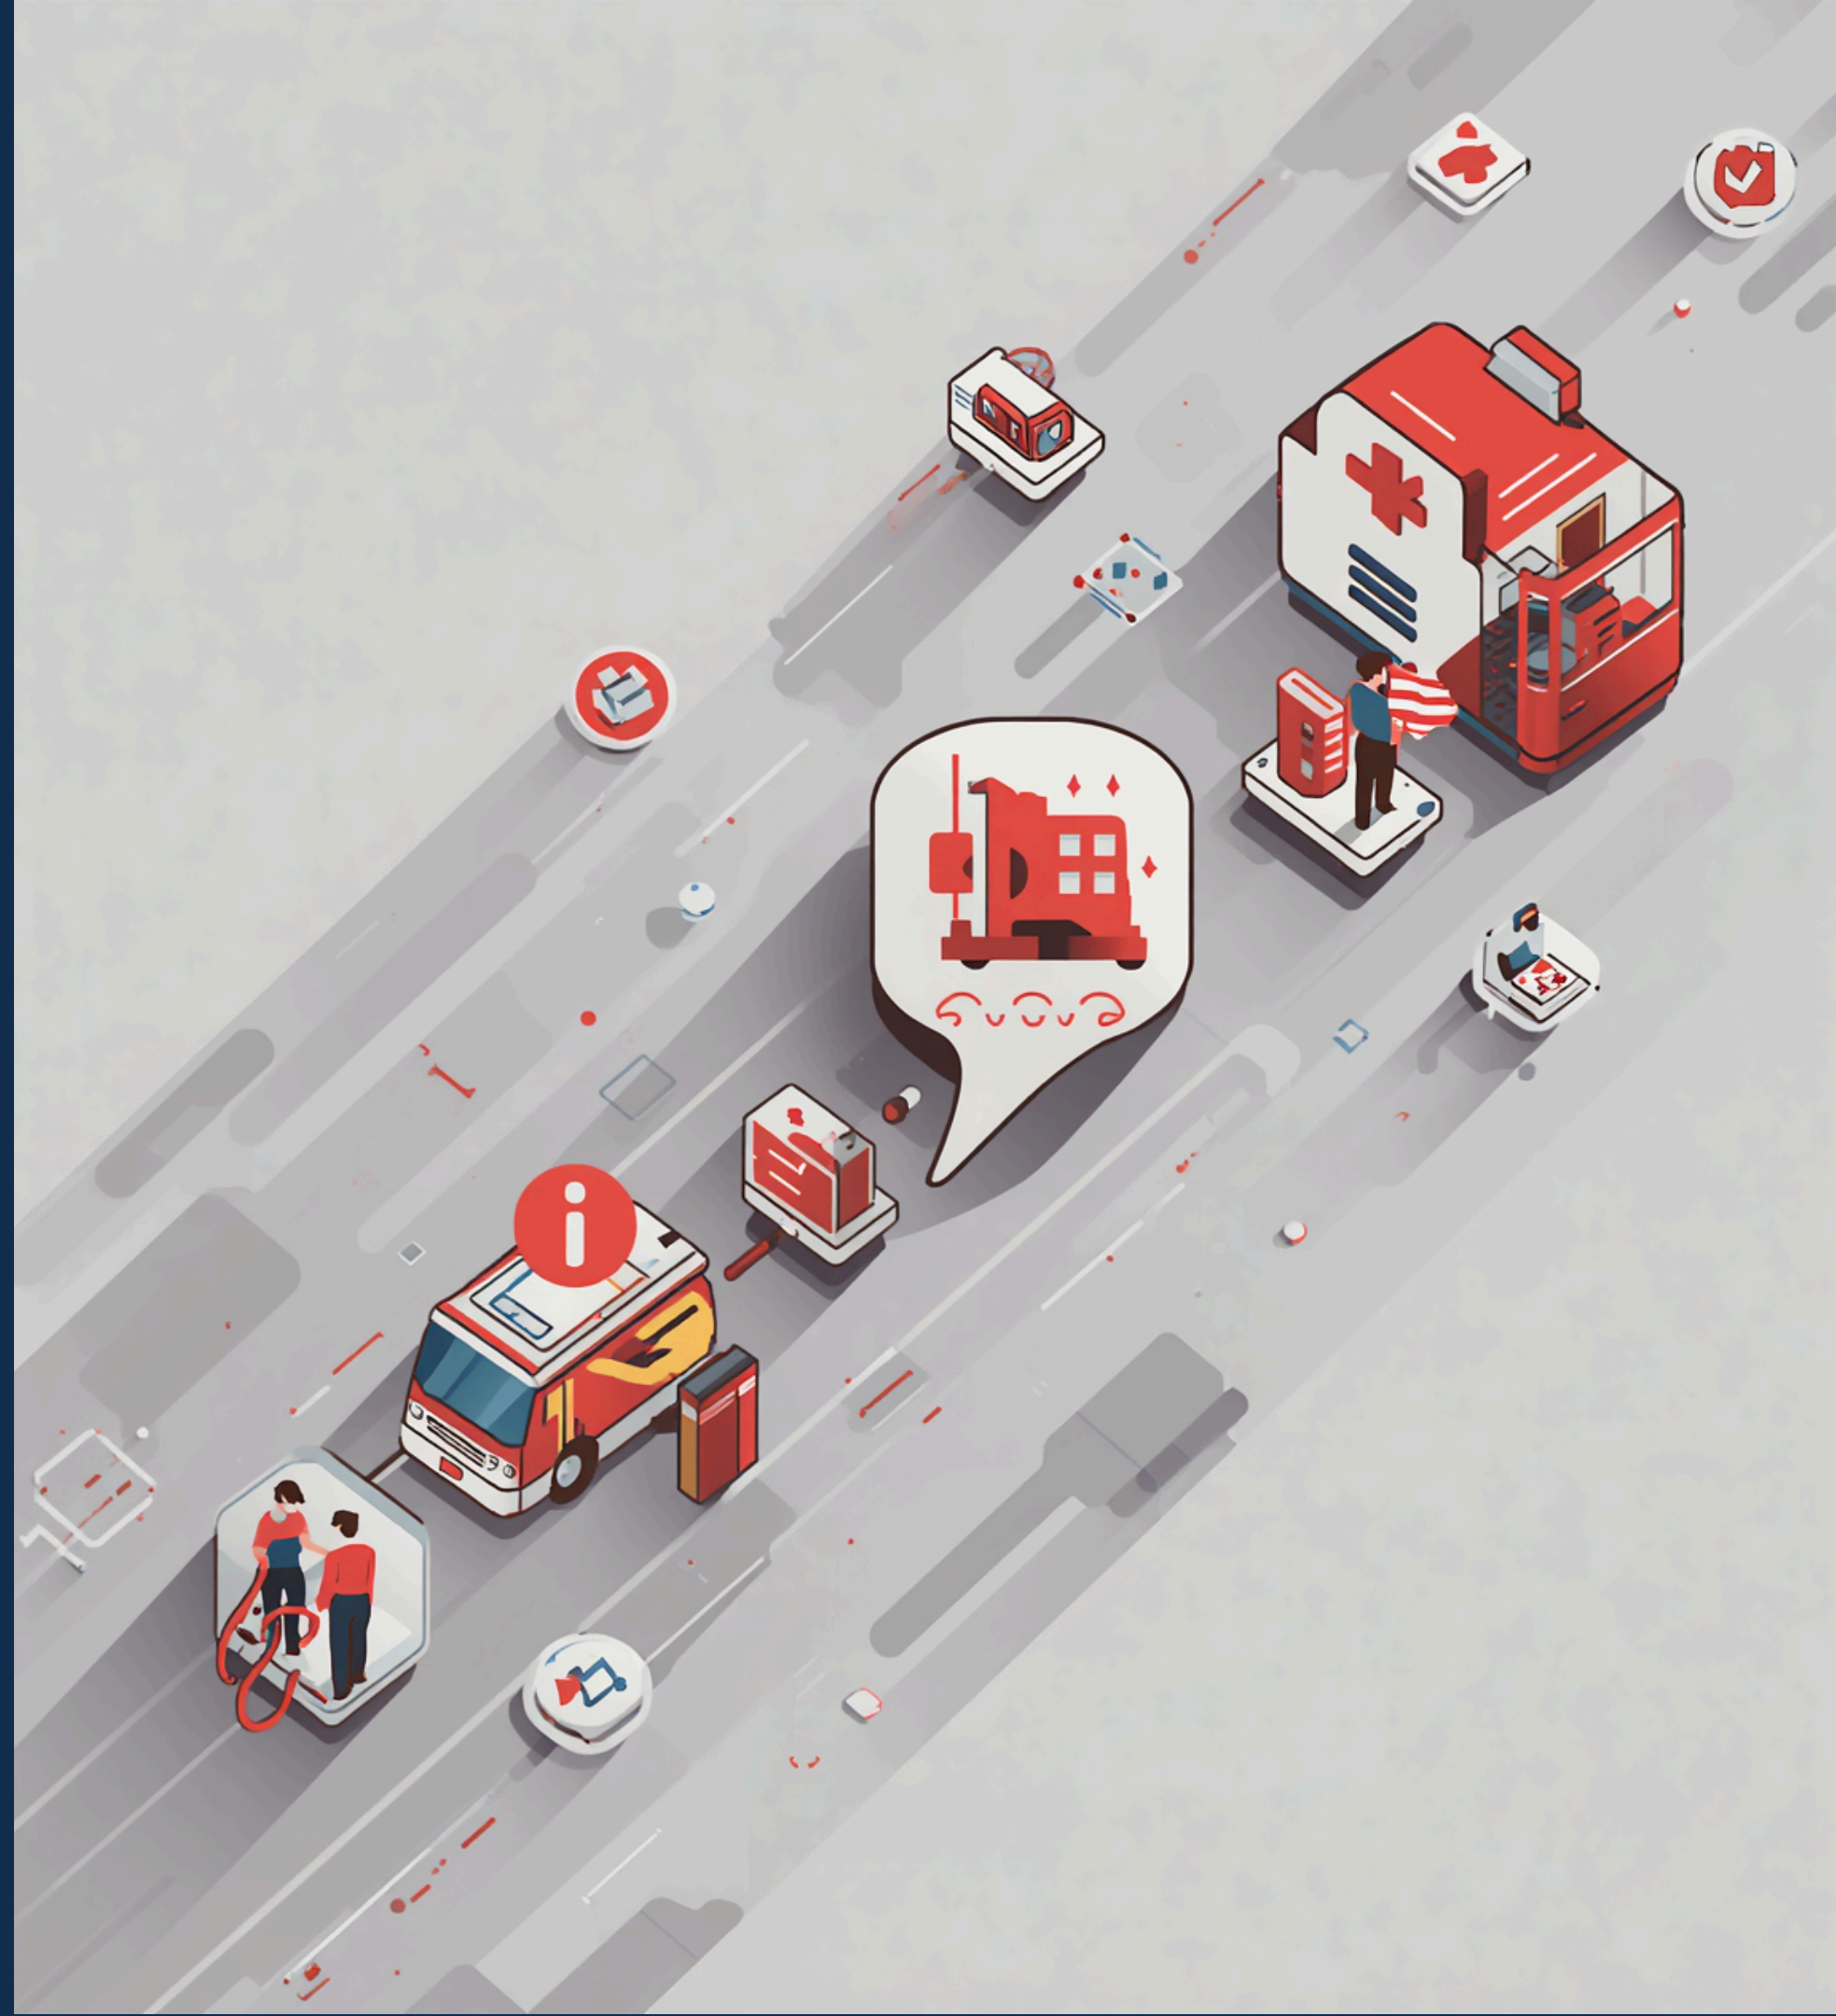

Transforming Response Through Coordination

APPorte enables a **data-driven emergency response**, providing real-time visibility of volunteers and resources. This centralized approach enhances coordination, ensuring timely action during critical climate events.

Evolution of APPorte's Design

The development of APPorte began with a thorough **Value Proposition Canvas** analysis, pinpointing key user pain points and establishing a foundation for a user-friendly interface focused on real-time coordination.

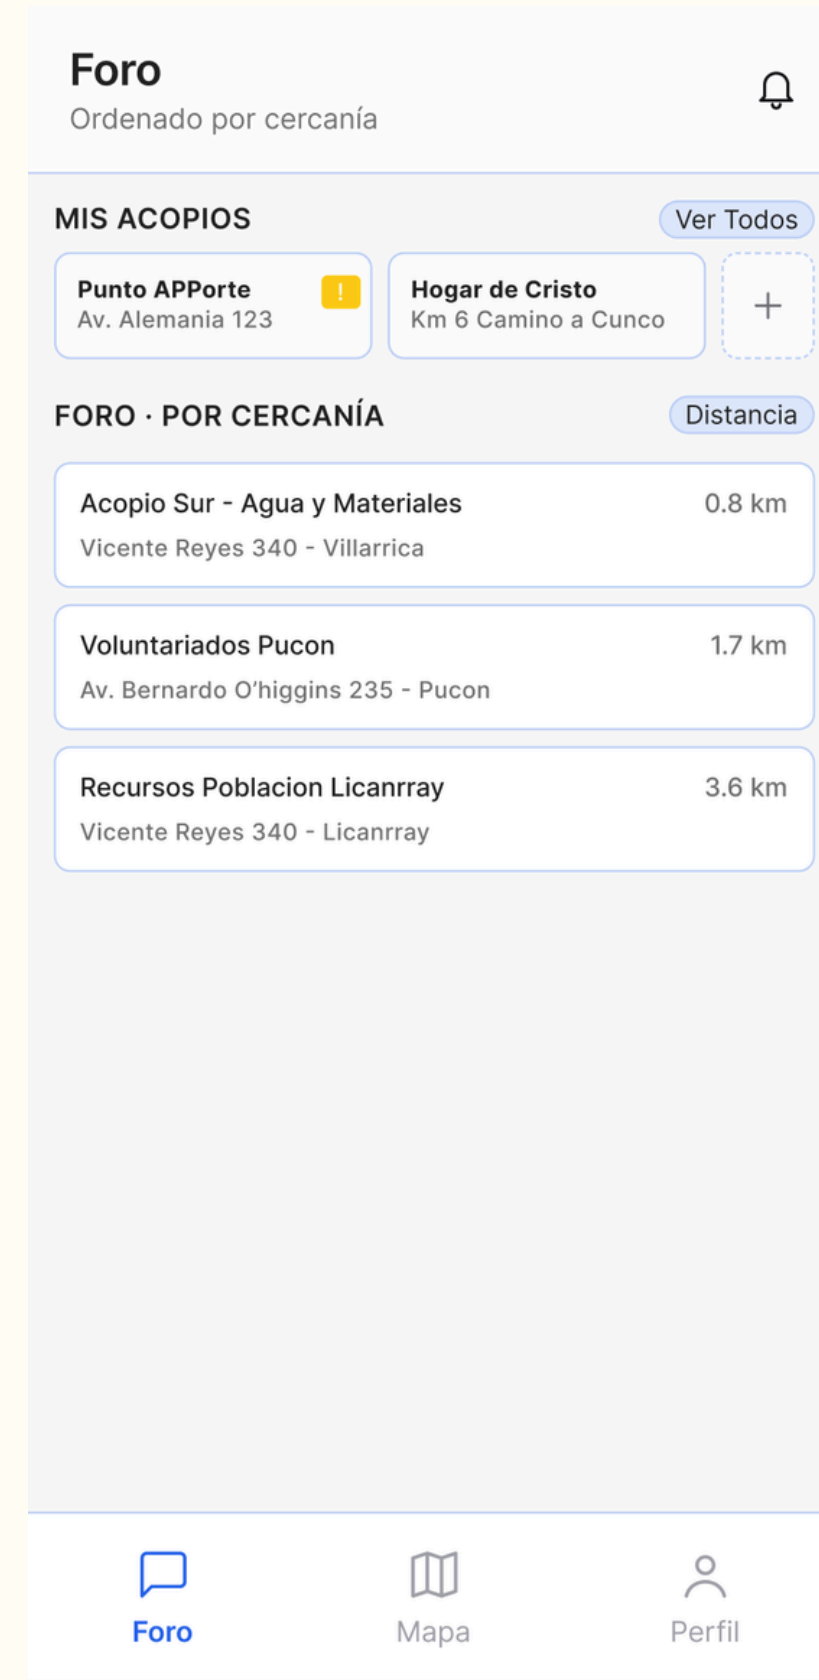

From Low-Fi to High-Def

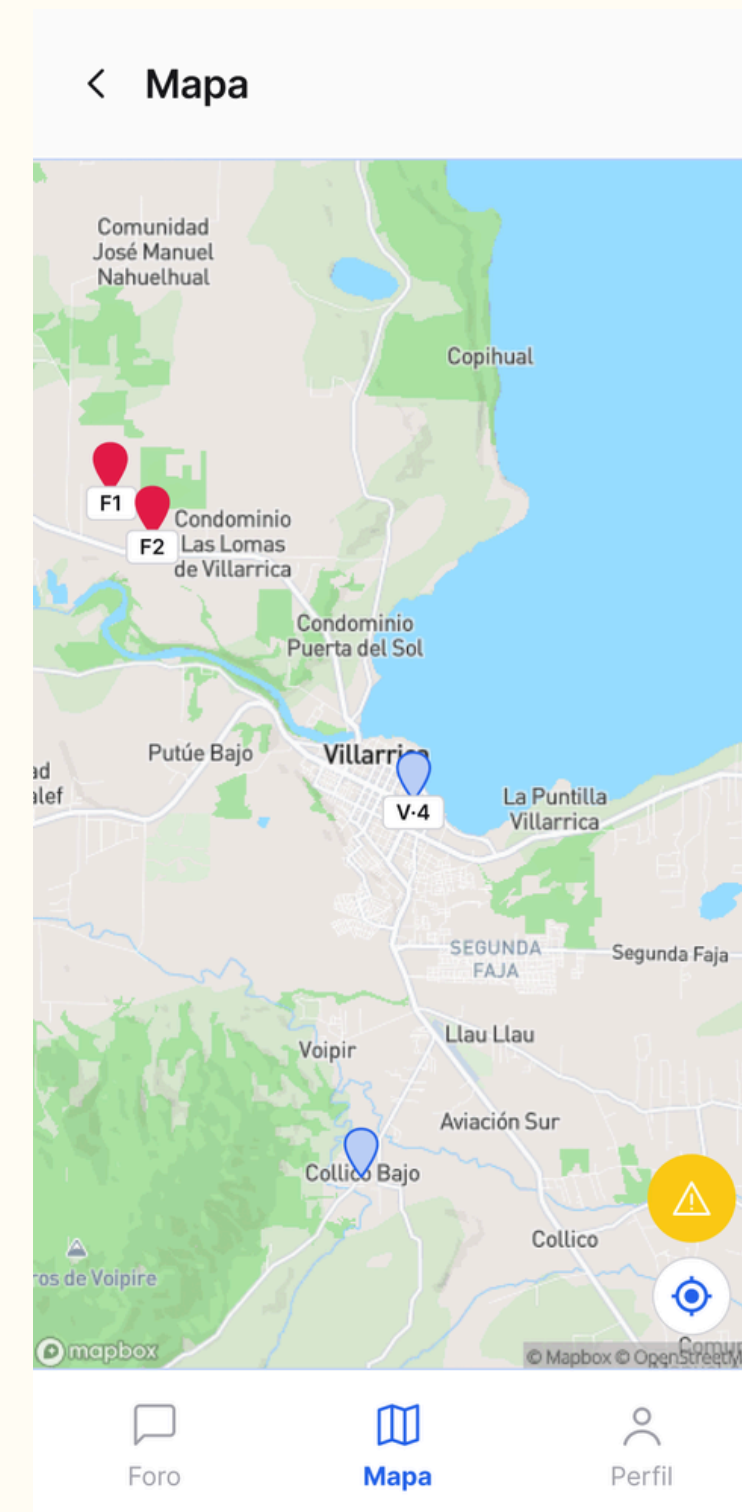

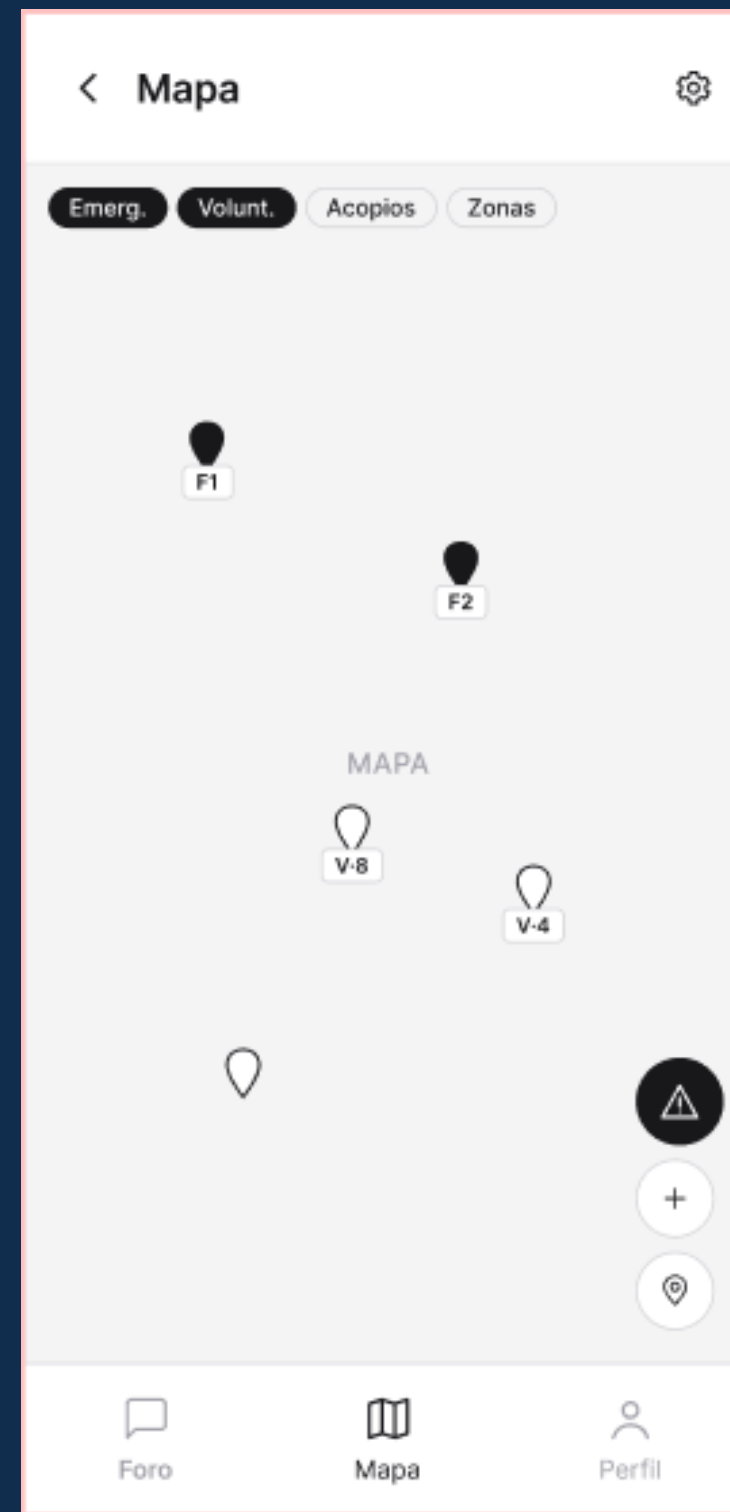

The interface evolution of APPorte showcases our transition from **basic wireframes** to high-definition designs, ensuring user-centered navigation and clarity for emergency coordinators during critical situations.

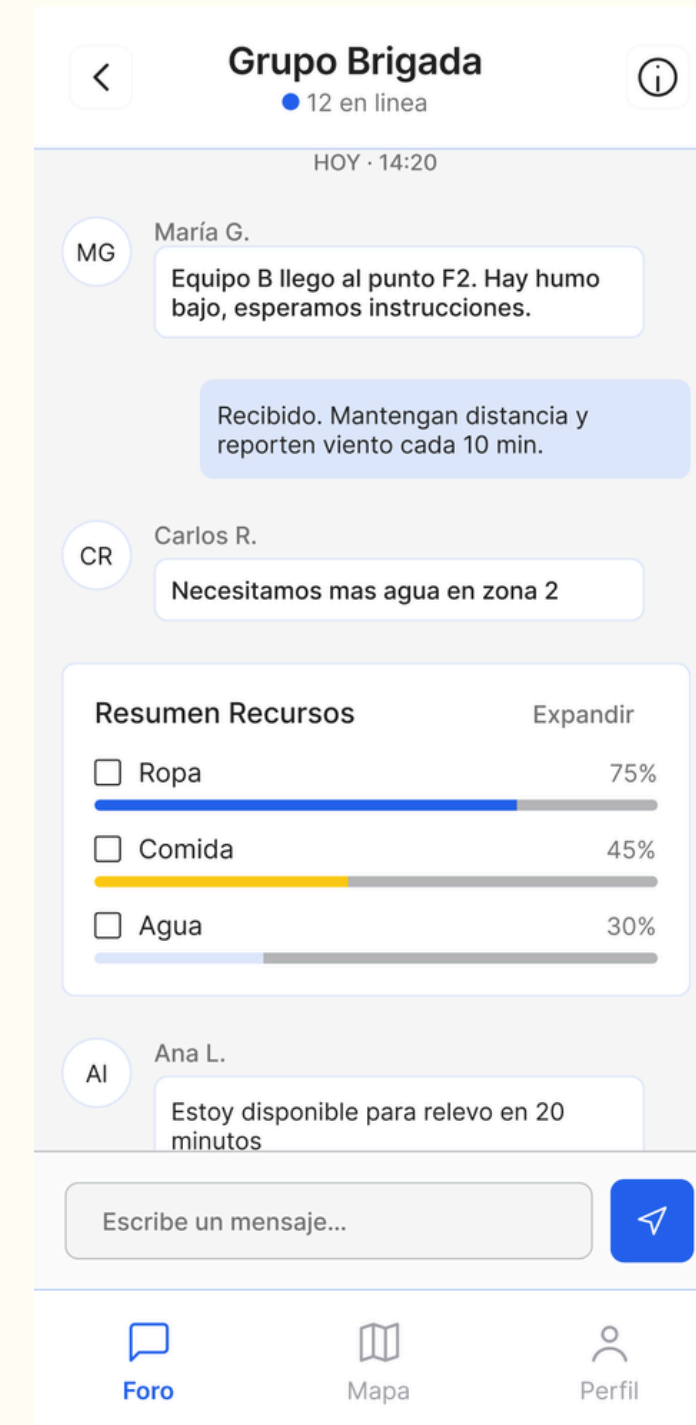

Interfaces evolution

Main Functionalities of APPorte

01

Squad Assignment

Real-time volunteer assignments with skill-matching filters.

02

Live Heat Map

Dynamic map updates active incidents and volunteer locations.

03

Resource Inventory

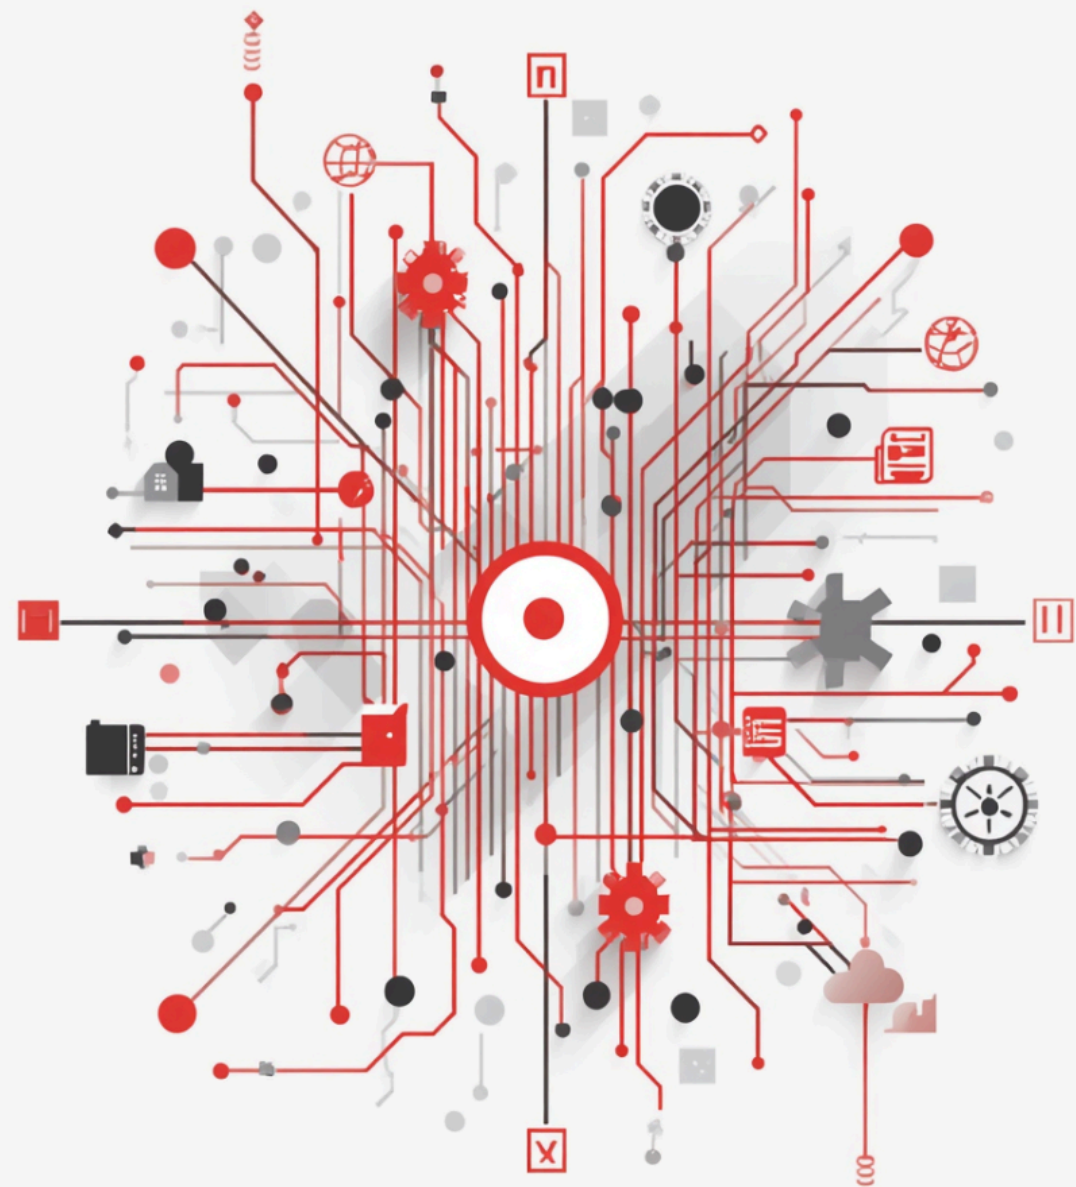

Centralized register shows current availability and status.

End-to-End User Journey

This journey illustrates the **complete process** from receiving an emergency alert to task completion, showcasing how APPorte streamlines coordination and enhances responsiveness during critical climate emergencies in La Araucania.
